Helmet Mounted Lamp

Safety torch with step lighting

Powerful, robust and safe, the L-20 can be used by hand or attached to the firefighter's helmet. **ATEX ZONE 0** certified for use in explosive atmospheres and confined spaces. Available with **photoluminescent bezel** and **step light diffuser** to illuminate the path.

Standards

Ex-Proof (ATEX)

IECEx

TECHNICAL DETAILS

- 3 AA batteries (included)

- **Power LEDEngine optics**, with a powerful high penetration in smoke spot light and long range
- **Step Lighting Diffuser**: light beam projected directly to the ground that illuminates the path (removable)
- **BOOSTER** (without diffuser): maximum power and penetration
- Push button switch of “soft touch” material, placed on the rear to guarantee easy finding and pushing with gloves
- Thermoplastic resin with high resistance to the impacts, extreme temperatures and corrosive substances
- **Photoluminescent bezel** that facilitates its location in case of accidental fall or loss, optional
- Attachable to most firefighter and emergencies helmets
- Carrying strap and helmet adapter included
- Accessories: rotating carrying holster and flexible signalling cone
