

CHEMICAL STORAGE, TRANSPORT AND CONTAINMENT

Product Code: 22060011-22070011
CONTAINERS

SafeCAN® Safe Storage and Transport Containers are made from two different materials: stainless steel and galvanized painted steel. The galvanized ones are coated with electrostatic paint. Depending on the chemical or solvent to be stored, different colors and applications are available. These secure containers come in various capacities ranging from 2 liters to 19 liters (0.5 Gallon - 5 Gallon) and can be used according to their suitability for specific conditions. The choice of material should be based on the type of liquid to be stored. Painted galvanized steel safety containers are more suitable for flammable petroleum derivatives. Stainless steel containers, on the other hand, are suitable for alcohols, ethers, aromatics, hydrocarbons, and chlorine-based hydrocarbons
