

FIREFIGHTER CUSHION

FIREFIGHTER CUSHION

The jump sheet fabric will be made up of two layers of 150 gr/m² tightly woven fabric sewn together.

The sheet will be four meters long and four meters wide.

The sheet will be reinforced with polyester narrow woven columns at least 50 mm in width and length every 50 cm.

The corners will be supported by the same reinforcement columns used in the diagonal direction on the sheet.

On the edges of the sheets, 50 mm holding columns will be erected at 1 meter intervals.

A clarification in an area of 70 cm² will be made of phosphorescent PVC laminated fabric in the middle of the sheet.

The jump sheet will be delivered with a carrying bag that will protect it from external factors.
