Heat-Activated Safety Dip Can | Self-Closing Lid

Heat-Activated Safety Dip Can is a premium safety device engineered to minimize human error and accident risks during cleaning and soaking tasks involving flammable liquids.

Standards

TSEK

K 207

TECHNICAL DETAILS

- **Heat-Sensitive Automatic Closure:** The precision safety mechanism integrated into the lid activates instantly upon detecting flame or extreme heat, automatically closing the swab basin's cover.
- **Fire Isolation:** The rapid lid closure cuts off the oxygen supply to the flammable liquid within the container, preventing a flash fire from escalating into a major disaster.
