IBC Poly Spill Pallet

Product Code: IBC Poly Spill Pallet

1. The pallet is used for secondary leak-proof storage of chemical storage containers to avoid splashing or leaking when the containers are dispensed or stored. This product is specially used for leakage treatment of IBC square chemical tanks, and is suitable for preventing spills of midsized containers.
2. The product is suitable for leak-proof packaging, storage and transportation of most mid-sized containers.
3. The product is manufactured by 100% polyethylene, which has a seamless structure and is safe and reliable.
4. The product has a large capacity of 298 gallons (1130 L).
5. The product has the quality of acid-alkali, corrosion and weather resistance, which can effectively prevent the harm of the leakage of chemical liquids.
6. The pallet is solid and durable. With the design of reinforced curled edge, it has higher endurance, which can prevent collision and crack.
7. The product is equipped with slip-proof and leak-proof grates, which can be removable and easy for cleaning and transportation.
8. There are supports in the middle of the pallet and the bottom of the grates, which is safer and more reliable.

9. The stackable pallets design reduces storage space and transportation costs.
10. The product has forklift slots at the bottom, which can be carried by forklift and pallet jack from 4 directions, making the transportation easy and fast.
11. The product complies with EPA 40 CFR264.175 standards and NPDES regulations.

Number of IBC Drum: 1

Loading Capacity (gallon / L): 298/1130

Loading Weight (Kgs.): 1600

Ext.Dimensions (H×L×W/cm): 90×135×135
