Polyamide Reflective Belt

It increases the person's ability to be seen in the dark environment where it is used.
From this point of view, it is a product that can be preferred by motorcycle users in traffic.
It can also be used in the industrial field.
3 cm reflective is used on the belt and 2 cm on the diagonal.
The belt is equipped with polyamide narrow webbing, adjustable buckles according to the special size.
It can be easily folded with a diameter of 10 cm. Thus, it provides the advantage of taking up less space.
