UNIX 1000 Half Face Mask (Dual Filter)

Article Number: 01020601

The half mask is used as the facepiece of UNIX 1000 filtering mask, designed to protect respiratory system
from gaseous and vaporous harmful substances and particles.
Suitable for application in any climatic
regions at temperatures from-40 oCto +40C

TECHNICAL DETAILS

Lightweight, compact, ergonomic
Convenient head harness adjustment and reliable fixing of the half mask on the head
The half mask is demountable by design, thus providing convenient in-service maintenance
Fast and reliable bayonet connection of filters
Wide range of gas and particle filters

SPECIFICATIONS
Initial airflow resistance at a constant volumetric
flow rate of 160 dm3/min, Pa (mm wc), not more than:
during inhalation: 127,5 (13,0)
during exhalation: 196,0 (20,0)

Half mask constant airflow resistance during exhalation at a flow
rate of30 dm3/min,Pa (mm wc), not more than: 29,5 (3,0)
Weight, g, not more than: 130
Size:1, 2,3
Material: Half mask body thermoplastic elastomer
