

Wall Type Decontamination Units

Article Number: 15057000 - 15057000-316 - 15057500

Wall type decontamination systems are suitable to use at Industry, Military, Civil Defence, Hospitals, Hazmat Response and Emergency Teams.

Chemical, biological, radiological, and nuclear (CBRN) decontamination is the removal of CBRN material from equipments or humans. Decontamination Systems provide sanitation and decontamination to the people who exposed to chemical or biological agents, as well as to extinguish burning clothes.

Standards

ANSI / ISEA Z358.1-2014

(Plumbing)

EAC/GOST-R

Meets requirements of ANSI

standard.

EN 15154-1

TECHNICAL DETAILS

- **Optimized for Restricted Spaces:** Specially designed for laboratories, hospital emergency rooms, and industrial facilities with narrow layouts. Its wall-mounted design ensures zero floor-space footprint.
- **Smart Nozzle Configuration:** Despite its compact size, the strategically positioned nozzles provide effective 360-degree irrigation, ensuring comprehensive decontamination of personnel or equipment.
- **AISI 304 / 316 Stainless Steel Integrity:** Built from premium stainless steel, it is not only rugged enough for industrial use but also aesthetically and hygienically suited for sterile medical and laboratory environments.
- **Seamless Integration:** Designed for quick connection to existing water lines. The compact form factor simplifies installation and future maintenance procedures.
- **Rapid Response Activation:** Features an intuitive and lightning-fast activation mechanism to ensure immediate performance during high-stress emergency situations.

OPTIONAL ACCESSORIES

Flow Switch

Freeze Protection Valve

The Flanged Water Inlet

Scald Protection Valve

The Hot & Cold Water Mixing Valve

The Foot Pedal Controller

The Wastewater Tank

The Trigger Valve

The Proximity & Motion Sensor

The Dirt Catcher Filter

The Three-Sided Enclosed Cabin
