

Wolf XT-50 Rechargeable Handlamp

Product Code: 08020527

Battery duration varies by model, from 4 hours of high output light (XT-50) to 11 hours (XT-90); selecting powersave doubles this duration. State of battery charge is indicated with a bar of high intensity red LEDs, which go out as battery charge diminishes and the beam flashes off repeatedly when recharging is required. Use of the latest lithium-ion battery technology improves reliability and eliminates 'memory' affect and the 'quick' charger base fully recharges the Handlamp in a minimum of 2 hours, dependent on model, and is configured as a holder with 'snap-in/snatch-out' function, for quick release but secure retention. Emergency illumination function illuminates Handlamp if power to the charger fails.

TECHNICAL INFORMATION

Battery duration varies by model, from 4 hours of high output light (XT-50) to 11 hours (XT-90); selecting powersave doubles this duration. State of battery charge is indicated with a bar of high intensity red LEDs, which go out as battery charge diminishes and the beam flashes off repeatedly when recharging is required. Use of the latest lithium-ion battery technology improves reliability and eliminates 'memory' affect and the 'quick' charger base fully recharges the Handlamp in a minimum of 2 hours, dependent on model, and is configured as a holder with 'snap-in/snatch-out' function, for quick release but secure retention.
