Industrial Aluminized Gaiters Against Radiant Heat and Molten Metal Splash

The FYRAL® 830V Protective Aluminized Foundry Gaiters for Radiant Heat and Molten Metal Splash provide superior protection against the effects of high heat, flames, molten metal splashes, and intense radiant heat in the casting and metalworking industries.

Key Features

Radiant Heat and Molten Metal Splash Protection: Protects the lower legs, ankles, and upper foot area against high heat, flames, and molten metal splashes.

Ergonomic Design

Provides comfortable movement with an ergonomic structure compliant with EN ISO 13688 standards.

Comfortable to Use

Designed as a gaiter, made with aluminized viscose fabric for maximum protection. It is lightweight and easy to wear.

Outer layer: Aluminized Viscose FR
Layer system: Single-layer

PERFORMANCE CLASS EN ISO 11612
