

SPASCIANI ST85 Mask

ST 85 is a professional, durable, and decontaminable half-face mask ideal for use when handling harmful chemicals, toxic gases, solvents, and dust in chemical industries. It features four removable quick-adjust buckles and an anatomical shape that allows the half-face mask to easily conform to the user's face.

Teknik Bilgiler

ST 85 is a professional, durable, and decontaminable half-face mask ideal for use when handling harmful chemicals, toxic gases, solvents, and dust in chemical industries. It features four removable quick-adjust buckles and an anatomical shape that allows the half-face mask to easily conform to the user's face.

ST 85 is equipped with a standardized connector according to EN 148-1. It can be used in combination with Spasciani Blue Line filters, including models 100, 200, 201, and the A2P3 filter. The half-mask can also be paired with a filter holder with a strap and a corrugated Spasciani TUR 60 or 90 tube for the use of Spasciani Blue Line filters, including models 202,

203, and the newest 204.
